GAINESBORO

Just Received A Car Load Of WIDE TRACK STOUGHTON WAGONS

This wagon is manufactured at Stoughton, Wis., by Stoughton Wagon Co. They have the largest wagon factory in United States and have been making the Stoughton since 1865.

This wagon is built out of A-grade, air cured timber and every piece guaranteed and the wagon is built according to Government specifications.

The Stoughton has the straight double front hound, which is the strongest that can be put in a wagon. The wheels have 14 and 16 dodged spokes, extra large oak hubs and two piece bent oak rims. A stronger wheel could not be built.

The patent dust proof skeins are moulded in a way to hold grease and keep out the dust with less friction, and are reinforced in a way that makes a stronger skein and a lighter running wagon.

The axles have a steel truss rod under them, which extends through the skeins and securely holds them in place and makes the axle much stronger.

The bottom of the box is made of long leaf yellow pine, the side boards are made of cottonwood and have angle iron strap bolts with brace at rear end of box.

The paint is put on by hand and not dipped like almost all other wagons.

There is nothing left off the Stoughton wagon that could be added to make it better.

Don't fail to see this wagon before buying elsewhere.

This wagon is sold and guaranteed by

Draper & Draper Co.

Tired

"I was weak and run-down," relates Mrs. Eula Burnett, of Dalton, Ga. "I was thin and just felt tired, all the time. I didn't rest well. I wasn't ever hungry. I know, by this, I needed a tonic, and as there is none better than—

CARDUI

The Woman's Tonic

"... I began using Cardui," continues Mrs. Burnett. "After my first bottle, I slept better and ate better. I took four bottles. Now I'm well, feel just fine, eat and sleep, my skin is clear and I have gained and sure feel that Cardui is the best tonic ever made."

Thousands of other women have found Cardui just as Mrs. Burnett did. It should help you.
